

Regarding the impact of the 2024 Noto Peninsula Earthquake on the Ishikawa factory (fifth report)

January 18, 2024

Hakusan Inc.

We would like to express our deepest sympathies to everyone affected by the Noto Peninsula Earthquake that occurred on January 1, 2024, and pray for the repose of the souls of those who lost their lives.

We would like to notify you as follows as the fifth report as of January 18, 2024 regarding the effects of the recent earthquake whose epicenter was in the Noto region of Ishikawa Prefecture.

The latest confirmed status at the Ishikawa Factory (Wakabadai, Shika-town, Hakui-gun), which is close to the epicenter, is as follows.

1. **About restarting production**

After confirming the damage to the factory, we are currently undertaking restoration work with the goal of quickly resuming production. We aim to resume production of MT Ferrule, a component for multifiber optical connector, by the end of February.

We have received a lot of support and words of sympathy from our business partners. I would like to take this opportunity to express my deepest gratitude. thank you very much.

We will do our best to resume production as soon as possible and respond to your expectations, so we appreciate your continued understanding and support.

We would also like to inform you that Hakusan Inc. was featured in the Nihon Keizai Shimbun's article regarding the resumption of production by companies in the Noto Peninsula earthquake-affected area.

[Noto's niche top is doing its best to restart optical fiber parts, etc.: Nihon Keizai Shimbun](#)

The latest information on the situation will be published on this website.

Please see below for affected products.
